

# TPM Customer Spotlight: Polymers Center

## About the Polymers Center....

**Website:**

[www.polymers-center.org](http://www.polymers-center.org)

**Industry:**

Polymers Research

**Location:**

Charlotte, NC

**TPM Products & Services:**

Solidworks Software  
Services & Consulting

*“TPM’s training has allowed us to get the most out of our existing programs and also expand our engineering service offerings.” – Amanda Hurd, Injection Molding Engineer*

The Polymers Center of Excellence is a not-for-profit 501(c)6 organization created by the state of North Carolina to increase knowledge, provide technical support, and assist in the development of emerging technologies in the plastics industry.

This mission is accomplished by providing compounding, injection molding, materials testing, training and engineering services. It is truly a “One Stop Shop” for polymers research; serving customers from startups to global corporations, and everything in between.

“TPM has been a great resource for the Polymers Center’s newest department: Engineering. With SolidWorks, we are now able to create drawings to use with our 3D printer and Moldex3D injection molding simulation software, and also perform FEA simulations. Their training has taken our capabilities to the next level. “

Phil Shoemaker, PhD  
Executive Director  
Polymers Center
