SUPPORT & SERVICES

TPM ONE

WHAT IT IS

TPM One is TPM's simple "Go To Market" strategy that focuses on maximizing technology ROI for our Architecture, Engineering, Construction, and Manufacturing Customers. Unlike any competitor in the marketplace, TPM brings the most complete offering of Design and Document Management solutions to the Region. In doing so, our Customers are able to spend less time managing technology and more time growing their own businesses. TPM One focuses in three main areas:

CONSOLIDATE

Merging multiple vendor relationships into TPM allows Customers to experience consolidated Service & Support, in addition to more strategic oversight of Company initiatives.

AUTOMATE

Leveraging technology, TPM works to Automate much of our relationship, from invoicing and payment, to automatic notifications about upcoming changes or issues with technology, to driving down the number of service & support calls by proactively monitoring technology assets.

ACCELERATE

When customers partner with the right vendor they are able to spend less time on managing technology and more time on their core business. Customers also experience accelerated technology adoption and quicker return on investment.
